Those with kidney disease can also take advantage of [DaVita Diet Helper](#)™— an easy-to-use meal planning tool that tracks phosphorus, potassium and sodium levels. It also features more than 1,000 recipes that are kidney and diabetes friendly. Individuals can also find nutrition tips and information on the [Kidney Diet Tips](#) blog.

More than 20 million adults over the age of 20 have kidney disease, which can progress to end stage renal disease. Most are unaware of their condition, as the disease is often symptomless until its late stages. Individuals at higher risk for kidney disease include those with diabetes or hypertension, as well as adults age 65 and older, African Americans, Hispanics and Native Americans.
