

DaVita Statement on Advancing American Kidney Health

DENVER, July 10, 2019 /PRNewswire/ -- [DaVita Kidney Care](#) appreciates President Trump, the Administration and Secretary Azar for taking steps to improve the lives of kidney patients. We appreciate the Administration's willingness to collaborate with the industry to ensure these new models address patient choice, prevention and transplantation.

Statement Attributable to Javier Rodriguez, CEO for DaVita Inc.:

"DaVita is encouraged that this Administration has taken steps toward holistic, value-based care for kidney patients. We have pushed for progressive policies to give all patients access to integrated kidney care, the benefits of which are significant to our patient population. Educating patients about kidney disease is critical to prevention and slowing its progression. Early intervention leads patients who may still need dialysis to choose the best treatment option for their lifestyle and reduces expensive hospitalizations.

In partnership with nephrologists, we are best positioned to deliver in the home dialysis space, as the largest provider of home dialysis in the U.S. We're accelerating home growth with our investments in technologies, such as home remote monitoring and a telehealth platform, to make it easier for patients to treat at home.

Our care team celebrates the more than 50,000 DaVita patients who are alive today because of transplants, and we aspire to ensure that even more patients on the waitlist receive a transplant. We are excited that the Administration is focused on improving the organ supply so that more patients can get a kidney transplant."
