This release contains forward-looking statements. Factors which could impact future results include the uncertainties associated with governmental regulation, general economic and other market conditions, and the risk factors set forth in the Company's SEC filings, including its Form 10-Q for the quarter ended September 30, 2001. The forward-looking statements should be considered in light of these risks and uncertainties. These risks include those relating to possible reductions in private and government reimbursement rates, the concentration of profits generated from PPO and private indemnity patients and from ancillary services including the administration of pharmaceuticals, the ongoing payment suspension and review of the Company's Florida laboratory subsidiary by its Medicare carrier and the Department of Justice, the ongoing review by the Civil Division of the US Attorney's Office for the Eastern District of Pennsylvania and the Company's ability to maintain contracts with physician medical directors.
