

DaVita Inc. Reports 3rd Quarter Results

PRNewswire
TORRANCE, Calif.

DaVita Inc., formerly Total Renal Care Holdings, Inc. , today announced results for the quarter ended September 30, 2000. Net earnings were \$13.2 million, or \$0.16 per share, excluding the previously announced extraordinary loss relating to the restructuring of our term loan. Continental U.S. EBITDA, earnings before interest, taxes, depreciation and amortization for the third quarter was \$76.7 million.

Quarterly financial highlights include:

- Continental U.S. dialysis revenue per treatment (excluding lab, management fees and other revenue) in the third quarter was \$260.41 as compared to \$249.23 in the second quarter, or a 4.5% increase. Continental U.S. DSO at quarter end was 77 days, including Florida Medicare laboratory receivables. This represents a 3-day improvement from the second quarter.
- The continental U.S. EBITDA margin for the third quarter was 21.4%. Net cash provided by operations for the three and nine months ended September 30, 2000 was \$84 million and \$195 million, respectively.
- As of the date of this release our leverage ratio (the ratio of net debt to EBITDA) is 3.2x, down from 5.5x at the beginning of the year. Total continental U.S. treatments for the third quarter were 1,347,970. Non-acquired treatment growth was 5.7%, which included same center treatment growth of 4.8%.
- At September 30, 2000 we operated 487 outpatient centers in the continental U.S. serving over 41,000 patients. During the quarter we sold 1 center and closed 1 under-performing center. Included in our continental patient and facility count are 4,700 patients in 55 centers under management. We also provide acute hemodialysis services to inpatients at approximately 290 hospitals.

Kent Thiry, Chairman and CEO stated, "The DaVita team worked hard to meet, and in several cases exceed, the expectations of each of our stakeholders. Although we still have a material number of poor contracts and an extensive need to build fundamental infrastructure, our team is relentlessly pursuing operational excellence."

Specifics of the third quarter charges and other developments:

- As a result of the restructuring of our revolving and term loan credit facilities in July 2000, we wrote-off certain financing costs reflected in the third quarter financial statements as a \$3.5 million extraordinary loss, net of tax, and additional debt expense of \$1.2 million pre-tax, or \$0.01 per share after-tax.
- In the third quarter we have ceased recognizing Medicare revenue from services provided at our Florida laboratory. This policy does not reflect a change in our determination that the tests performed are medically justified and should ultimately be reimbursed. Our decision is based solely on the fact that we have not been paid for services rendered in over two years and we are uncertain when we will achieve resolution of this matter.
- In October the United States District Court entered a Final Judgment approving the Stipulation of Settlement that DaVita previously entered into with the plaintiffs in the consolidated securities class actions that were filed against Total Renal Care and several of its former officers in February 1999. As a result of the Final Judgment, the class actions are dismissed and the litigation is over. DaVita's portion of the settlement was funded and recorded in the second quarter of 2000.

This release contains forward-looking statements regarding the Company's expected third quarter results and ability to sustain those results. Actual results could differ materially from these forward-looking statements.

Factors which could cause or contribute to such differences include the uncertainties associated with governmental regulation, general economic and other market conditions, and the "risk factors" set forth in the Company's SEC filings, including its Form 10-Q for the quarter ended June 30, 2000. These risks include (1) possible changes in private and government reimbursement rates, (2) the concentration of profits generated from private indemnity patients, (3) the ongoing payment suspension and review of the Company's Florida laboratory subsidiary by its Medicare carrier and the Department of Justice, (4) its ability to maintain contracts with physician medical directors and (5) the risks relating to the large amount and terms of the Company's outstanding debt. The forward-looking statements should be considered in light of these risks and uncertainties.
