- (3) The reported balance sheet amounts at December 31, 2012, September 30, 2012 and December 31, 2011, are net of \$21.5 million, \$6.6 million and \$7.8 million, respectively, of debt discounts associated with our Term Loan B-2. Term Loan B and our Term Loan A-2.
- (4) The Term Loan B and Term Loan B-2 are subject to LIBOR floors of 1.50% and 1.00%, respectively. Because LIBOR, for all periods presented above, was lower than either of these embedded LIBOR floors, the interest rates on the Term Loan B and the Term Loan B-2 are set at their respective floors. At such time as the LIBOR-based component of our interest rate exceeds 1.50% on the Term Loan B and 1.00% on the Term Loan B-2, we will then be subject to LIBOR-based interest rate volatility on the LIBOR variable component of our interest rate on all of the Term Loan B-2, as well as for the Term Loan B, but limited to a maximum rate of 4.00% on \$1.25 billion of outstanding principal debt on the Term Loan B. The remaining \$465 million outstanding principal balance of the Term Loan B is subject to LIBOR-based interest rate volatility above a floor of 1.50%.
- (5) Operating results of HCP are included for the period November 1, 2012 through December 31, 2012.

Note 1: Calculation of the Leverage Ratio

Under the Senior Secured Credit Facilities (Credit Agreement), the leverage ratio is defined as all funded debt plus the face amount of all letters of credit issued, minus cash and cash equivalents, divided by "Consolidated EBITDA". The calculation below is based on the last twelve months of "Consolidated EBITDA", pro forma for routine acquisitions that occurred during the period. The Company's management believes the presentation of "Consolidated EBITDA" is useful to investors to enhance their understanding of the Company's leverage ratio under its Credit Agreement.

1. Net income and diluted net income per share attributable to DaVita HealthCare Partners Inc.excluding transaction expenses associated with the acquisition of HCP, debt refinancing charges, legal settlement and related expenses and a non-cash goodwill impairment charge, which are all net of related tax.

We believe that net income attributable toDaVita HealthCare Partners Inc. excluding transaction expenses associated with the acquisition of HCP, debt refinancing charges, legal settlement and related expenses and a non-cash goodwill impairment charge, which are all net of related tax, enhances a user's understanding of our normal net income attributable to DaVita HealthCare Partners Inc. and diluted net income per share attributable toDaVita HealthCare Partners Inc. for these periods by providing a measure that is meaningful because it excludes an unusual amount of transaction expenses associated with the acquisition of HCP, debt refinancing charges related to the amendment of our credit agreement and the repayment of our Term Loan A-2, an unusual charge for a legal settlement that we reached to settle federal program claims relating to our historical Epogen practices and also excludes a non-cash goodwill impairment charge that resulted from a decrease in the implied fair value of goodwill below its carrying amount associated with our infusion therapy business in 2011 and accordingly, is more

comparable to prior periods and indicative of consistent net income attributable to DaVita HealthCare Partners Inc. and diluted net income per share to DaVita HealthCare Partners Inc. These measures are not measures of financial performance under United Statesgenerally accepted accounting principles (GAAP) and should not be considered as an alternative to net income attributable to DaVita HealthCare Partners Inc. and diluted earnings per share attributable to DaVita HealthCare Partners Inc.

3. Effective Income Tax Rates

We believe that reporting the effective income tax rate attributable toDaVita HealthCare Partners Inc.enhances an investor's understanding of DaVita's effective income tax rate for the periods presented because it excludes noncontrolling owners' income that primarily relates to non-tax paying entities and accordingly is more comparable to prior periods presentations regarding DaVita's effective income tax rate and is meaningful to an investor to fully understand the related income tax effects on DaVita HealthCare Partners Inc.'s operating results. This is not a measure under GAAP and should not be considered as an alternative to the effective income tax rate calculated in accordance with GAAP.

4. Free cash flow

Free cash flow represents net cash provided by operating activities less distributions to noncontrolling interests and capital expenditures for routine maintenance and information technology. We believe free cash flow is a useful adjunct to cash flow from operating activities and other measurements under GAAP, since free cash flow is a meaningful measure of our ability to fund acquisition and development activities and meet our debt service requirements. In addition, free cash flow excluding distributions to noncontrolling interests provides an investor with an understanding of free cash flows that are attributable to DaVita HealthCare Partners Inc. Free cash flow is not a measure of financial performance under GAAP and should not be considered as an alternative to cash flows from operating, investing or financing activities, as an indicator of cash flows or as a measure of liquidity.

5. Total care dollars under management

In California, as a result of its managed care administrative services agreement with hospitals, HCP does not assume the direct financial risk for institutional (hospital) services, but is responsible for managing the care dollars associated with both the professional (physician) and institutional services being provided for the Per Member Per Month (PMPM) fee attributable to both professional and institutional services. In those cases, HCP recognizes the surplus of institutional revenue less institutional expense as HCP revenue. In addition to revenues recognized for financial reporting purposes, HCP measures its total care dollars

under management, which includes the Per Member Per Month (PMPM) fee payable to third parties for institutional (hospital) services where HCP manages the care provided to its members by the hospitals and other institutions, which are not included in GAAP revenues. HCP uses total care dollars under management as a supplement to GAAP revenues as it allows HCP to measure profit margins on a comparable basis across both the global capitation model (where HCP assumes the full financial risk for all services, including institutional services) and the risk sharing models (where HCP operates under managed care administrative services agreements where HCP does not assume the full risk), HCP believes that presenting amounts in this manner is useful because it presents its operations on a unified basis without the complication caused by models that HCP has adopted in its California market as a result of various regulations related to the assumption of institutional risk. Total care dollars under management is not a measure of financial performance computed in accordance with GAAP and should not be considered in isolation or as a substitute for revenues calculated in accordance with GAAP. Total care dollars under management includes PMPM payments to third parties that are not recorded in our accounting records and have not been reviewed and are not otherwise subject to procedures by our independent auditors. The following table reconciles Total Care Dollars Under Management to medical revenues to the periods indicated. "Total Care Dollars Under Management" is a non-GAAP measure.
